Pricing Calculator Instructions

- On the Price Calculator screen, type in the specific drug you want to price into the "Drug" field and click the "Search" button.
- Some drugs will have multiple choices you can choose from, choose the drug which corresponds to the one you would like to price.
- After making your drug selection, you will be sent to the Pricing Calculator Options screen. This screen prompts you to input a few options that will help correctly price your drug.

Price Calculator Options

Specify Packaging and Quantity for WELLBUTRIN SR

Packaging	<input type="text" value="100 MG TB12 (Brand w/Generic Maintenance)"/>	<input type="button" value="v"/>
Days Supply	<input type="text" value="10"/>	
<input checked="" type="radio"/> Daily Usage	<input type="text" value="2"/>	
<input type="radio"/> Total Quantity	<input type="text" value="20"/>	

Either Compute Price at a Typical Retail Pharmacy

-or- Select Pharmacies in Your Zip Code

Zip Code

- **Packaging** – This option allows you to choose the correct strength and packaging of your drug.
 - **Days Supply** – This option allows you to input the amount of days that you will be filling your medication for.
 - **Daily Usage** – You can either use this option or the Total Quantity option to choose your usage amount. If you use daily usage, input how many times you are prescribed to take your drug daily. As an example, if your prescription has you taking two pills daily, then you will write “2” in the Daily Usage field.
 - **Total Quantity** – The other option for usage is Total Quantity. In this field, you can input the total quantity that was prescribed to you. A way to figure out quantity would be if you were prescribed a drug that has a 10 day supply, and you are taking 2 a day, that would be a total quantity of 20 pills.
- You have two options after you have entered all required fields on the Price Calculator Options:
 1. Click “Calculate Price” which will provide the following results:
