

PREMIER DRUG TIER

Your health plan offers certain low cost and over-the-counter medications at an enhanced benefit! Drugs included in the Premier Drug Tier are available at no cost to you! The next time you visit your doctor ask switching to a drug on this list is right for you.

How it Works

1. Tell your doctor that your prescription drug plan covers listed medications at ZERO cost to you.
2. Obtain a written prescription from your doctor. Some Premier Tier Drugs are available over-the-counter, but your doctor must write you a prescription for the pharmacy to process it through your plan.
3. Take the prescription to a pharmacy to have it filled at ZERO cost! For over-the-counter drugs, tell the pharmacist your plan offers coverage for the drugs on this list and to use the prescription to process it through your plan.
